JODY OSTENDORF

**State Implementation Plan Program Manager
USEPA Region 8**

on

Final Updates to the National Ambient Air Quality Standards for Ozone

The Clean Air Act charges the EPA Administrator with setting primary standards that are requisite to protect public health with an adequate margin of safety. The body of scientific evidence on ozone and health has expanded significantly since EPA last reviewed the ozone standards in 2008. New clinical studies, that have become available since 2008, provide evidence of harmful effects to healthy, exercising adults at levels within the 2008 standard of 75 ppb. Ms. Ostendorf will discuss EPA's October 1, 2015 decision to tighten the ozone standard to 70 ppb and other provisions of the final rule.

TIME:

**Thursday, January 21st
12:00 to 1:00 p.m.**

Check in begins at 11:45 a.m.

PLACE:

**US EPA, Bitterroot Room (2nd Floor)
1595 Wynkoop Street, Denver, CO 80202**

About the speaker

Jody Ostendorf has 17 years of experience at EPA Region 8, and is currently working on ozone issues in the Air Quality Planning Unit. She has also worked in Technical & Financial Services, NEPA, Superfund, the Office of Communications and Public Involvement, and the Office of Solid and Hazardous Waste. In 2011, Jody graduated from the Regional Institute of Health and Environmental Leadership's year-long Advanced Leadership Program. She has a Master's degree in International Environmental Policy and Natural Resources Management from Indiana University and a B.S. degree from Ohio University. Prior to graduate school, she was a Forestry volunteer with the U.S. Peace Corps in Benin, West Africa.
